## **DETAILED ACTION**

### ***Allowable Subject Matter***

**Claims 1 – 5, 12 – 14, 16 – 17 and 19 – 30** are allowed.

The following is a statement of reasons for indication of allowable subject matter.

The prior art fails to teach or suggest, the limitations of:

- “based on the first product being a cross-marketed product, calculating and recording an amount of cross-marketing revenue realized from a predetermined portion of the cost of the straight sale to a marketing fund in the database; and based on providing of the discount, allocating at least a portion of the cross-marketing revenue...to reimburse the second company...” (as in Claim 1).
- “based on a providing of the discount of the discount to the consumer, depositing a predetermined amount of money into a marketing fund account maintained at the server for the benefit of the second company in at least partial compensation for providing the discount.” (as in Claims 13 and 16).
- “recording an amount of cross-marketing revenue realized from the straight sale to a marketing fund account, wherein the marketing fund account is structured to defray the second company's costs in dispensing products in conjunction with a first promotional discount value earned by the purchase of the first company's products, and the first company's costs in dispensing products in conjunction with a second promotional discount value earned by the purchase of the second company's products.” (as in Claim 17).

Such limitation is present in all independent claims.

It is old and well known in the art to cross-market products and/or services, such as offering a promotional discount for a second product conditioned upon the purchase of a first product. Prior art references have numerous names for such marketing arrangements – upsales, cross-promotions, product bundling, marketing alliances and co-marketing.

However, while the general concept and practice of cross-marketing is old and well known, the prior art fails to disclose nor suggest the financial underpinnings of this marketing arrangement as articulated in the present application.

The majority of the prior art references are directed not towards a direct compensation of each company based upon the separate revenue generated by the companion product sold as part of the co-marketing mix, but rather towards achieving greater marketing efficiencies or higher marketing visibility through the co-marketing. While achieving greater marketing efficiencies ultimately translates into greater financial rewards for the companies involved through higher sales or lower marketing costs, direct division of the financial revenue generated by the product mix is rarely discussed.

Therefore, the instant application distinguishes from these common practices by utilizing an amount of revenue generated by the straight sale of a first product to defray the cost of a promotional offer concerning a second product.

Walker (US Patent 6,694,300) discloses a method/system for cross-marketing products between a first company (merchant) selling a first product and a second company (sponsoring merchant) selling a second product (supplementary product) in

which based upon a first product being a cross-marketed product (product identifier that satisfies an upsell condition) providing a discount for a second product. (see col. 5, line 13 – col. 6, line 10). Neither this patent, alone nor in combination with others, discloses nor suggests the feature of utilizing an amount of revenue generated by the straight sale of a first product to defray the cost of a promotional offer concerning a second product.

Debelak (Debelak, Don. *Marketing Plan: Develop a Comprehensive Sales and Marketing Plan for Your Business, Service, or Product*. Adams Streetwise. 2000. p. 138) discloses a method for cross-marketing between a first company selling a first product/service (new carpeting) and a second company selling a second product/service (maid service) in which based upon a first product being a cross-marketed product/service (part of a cross-promotion) providing a discount (free coupons) for the second product/service. Neither this non-patent literature, alone nor in combination with others, discloses nor suggests the feature of utilizing an amount of revenue generated by the straight sale of a first product to defray the cost of a promotional offer concerning a second product.
